ABOUT ME

I'm a self-taught fullstack developer passionate about creating clean, responsive web apps using HTML, CSS, JavaScript, React and Express. Certified by freeCodeCamp, with experience building real-world projects like a full school website. Always curious, always building.

PROJECTS

MxCypher

Text Encryption App

MX Cypher is a simple encryption-decryption tool inspired by Dan Brown's Digital Fortress. This project brings that moment of Susan Fletcher and David Becker to life. Built with ❤️ & JavaScript.

[Code](#)

KSTS School Website

School Website

A multipage responsive school site built independently during my time in high school.

[Live](#)

[Code](#)

MyMusic

Music Visualizer

A real-time music visualizer built for the browser. Select your favorite music locally from your device, and watch audio-reactive visuals come to life as it plays.

KSTS Votingsystem

Voting System

A school election platform during my time in high school to help make voting fast and easy. Students vote securely using unique access codes based on their course and year. Developed in high school, 2023.
