Michael Boateng

Front-end developer | HTML | CSS | SCSS | JavaScript | React | TypeScript and other front-end technologies.

Kumasi, Ashanti Region, Ghana

Summary

Passionate about Programming | Front-end Web Developer | Aspiring AI

Hey there! I'm Michael, a self motivated student from Kumasi, Ghana, on a journey through the world of programming, science and technology.

My Journey: My coding journey began in Junior High School when I first learned Python. From there, I delved into web development, mastering HTML, CSS, JavaScript, React and other stuffs. During my time in Senior High School, I had the opportunity to put my skills to use by developing a school website and a voting platform for prefects' elections. Despite challenges accessing formal education (University), I persevered, utilizing online resources like FreeCodeCamp, YouTube and various online courses to continue learning and growing. My passion for technology makes me enjoy to solve problems and make a positive change in the world.

☺ **My Leisure Time:** I like to talk with other developers online, shearing ideas and learning new stuff. I also enjoy learning new stuff by studying some online courses. And, I'm gonna admit, I love science and I'm a bit of a sci-fi buff, so I like to think of myself as a programming cyborg from the future, using my skills to make the world a better place, one line of code at a time.

Web Wizardry: I've love problem solving since I started Python till now, I've crafted numerous web projects. During my time in Kumasi Senior High Technical School, I worked on various projects, including creating a school website and developing a voting platform for prefects election.

Always Exploring: I'm always curious and eager to learn more. I'll focused on understanding AI development and how it can change the world of technology.

Life long Learner: I believe in learning all the time, no matter where you are. Even though it's not easy to get education in Ghana, I use free online resources to learn about everything from science to technology.

My Vision: I dream of creating software and services that help people while also making progress in AI development and research.

My Quote: "When curiosity meets passion, innovation becomes limitless"

My Favorite Quote: "Today I will do what others won't, so tomorrow I can do what others can't".

Let's Connect: I'm passionate about collaborating, sharing ideas, and making a change in the tech world. Let's connect and find opportunities in science and technology.
